

CS 410 Project Progress Report

1. Completed tasks

- Project file structure setup
- Initial full-stack code setup
- Gained access to the Reddit PRAW API

2. Pending tasks

- Connect frontend to backend for seamless communication.
- Parse data from the comments of the r/recipes subreddit to get the necessary information for recipe searches.
- Format data into proper structure for later search methods
- Implement search method.

3. Facing any challenges

- Technical constraints with the PRAW API that may not allow required data access.
- Efficient search methods for less runtime and seamless operation of the program.
